# Who are we?

In **2015**, a team of top engineers of optics, electronics, computers & algorithm from Chinese Academy of Sciences decided to accelerate the era of digital dentistry and let every dentist have one intraoral scanner. This is how panda started.

In **2016** and **2017**, we launched PANDA P1 intraoral scanner. P1 was the first powder-free intraoral scanner and the final resolution was true color.

In **2019**, we launched the revolutionary PANDA P2 intraoral scanner and got CFDA approval in the 2nd half of **2020**, as well as CE, ISO13485, INMETRO, ANVISA and more certifications.

In **2021**, we beat other traditional IOS brands and became the NO.1 top seller in Chinese Market with more than 3000 units installed!

Panda Scanner is the only intraoral scanner with clinical trial report in China!

Freqty is the only domestic manufacturer invited to draft National Standard of Digital Impression!

In **2022**, PANDA P3 is officially launched with new features of button control and motion sensing. By middle of **2022**, Panda Scanner has already scanned more than 1 million cases!

In **2023**, we will not only shake but also shape the Intraoral scanner industry.

## Button Control

The tiny button carries great responsibilities, controlling the entire digital workflow. It prevents cross contamination by not touching the screen or clicking the mouse. Safety is always the top priority.

## Motion Sensing

The gyroscope inside the scanner allows to see different angle of scanned images by just simply rotating the scanner. So you do not have to touch the screen to see the image.
